# JOURNAL OF PUBLIC ECONOMICS

**Editorial Policy**

The aim of the *Journal of Public Economics* is to encourage original scientific contributions to the problems of public sector economics, with particular emphasis on the application of modern economic theory and methods of quantitative analysis. It will provide a forum for discussion of public sector policy, and bring together work which has in the past been scattered among a number of less specialised journals.

**Editorial Board:**

*Editors:*

A.B. ATKINSON, London School of Economics, 10 Portugal Street, London WC2A 2HD, UK

N.H. STERN, London School of Economics, 10 Portugal Street, London WC2A 2HD, UK

*Co-Editors:*

The *Journal of Public Economics* is published in volumes of approx. 400 pages; in 1987 three volumes will be published, each consisting of three issues of approx. 135 pages.

**Subscription:** 1987 (3 volumes)

The Journal of Public Economics (ISSN 0047–2727) is published in volumes of three issues. The subscription price for 1987 (Volumes 32–34) is SF 600+SF 90 p.p.h.=SF 690. Our p.p.h. (postage, packing and handling) charge includes surface delivery of all issues, except to subscribers in the following countries where air delivery (S.A.L. – Surface Air Lifted) is ensured: Argentina, Australia, Brazil, Canada, China, Hong Kong, India, Israel, Japan, Malaysia, Mexico, New Zealand, Pakistan, Singapore, South Africa, South Korea, Taiwan, Thailand, U.S.A. For the rest of the world airmail charges are available upon request. *Personal Subscription:* Private subscribers are entitled to a subscription at the reduced rate of SF 255, including postage. The following rules apply: (1) subscription must be prepaid; (2) the order must be sent direct to the Publisher; (3) the copies should not be made available to institutions. Subscriptions should be sent to the Publisher, Elsevier Sequoia, P.O. Box 564, Lausanne, Switzerland, or to any subscription-agent or bookseller. Claims for issues not received will be honoured free of charge if made within three months of the publication date.

(North-Holland), P.O. Box, 1991, 1000 BZ Amsterdam, The Netherlands.

Submission of a paper to this journal entails the author's irrevocable and exclusive authorization of the publisher to collect any sums or considerations for copying or reproduction payable by third parties (as mentioned in article 17 paragraph 2 of the Dutch Copyright Act of 1912 and in the Royal Decree of June 20, 1974 (S. 351) pursuant to article 16b of the Dutch Copyright Act of 1912) and/or to act in or out of Court in connection therewith.

*Special regulations for readers in the U.S.A.* — This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, U.S.A. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US $2.25 also payable through the Center. (N.B. For review journals this fee is $0.20 per copy per page.) Not for-profit educational institutions and instructors attached thereto, subscribing to this journal, are permitted to photocopy isolated articles for not-for-profit classroom or library reserve use without fee. This consent does not extend to other kinds of copying, such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the publisher for such copying.

*Special regulations for authors* — Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

*Manchester M15 6PB, England*

The **International Journal of Forecasting (IJF)** is the official publication of the *International Institute of Forecasters (IIF)* and shares its aims and scope. The Journal publishes high quality refereed papers covering all aspects of forecasting. Its objectives (and that of the IIF) are to unify the field, and to bridge the gap between theory and practice. The intention is to make forecasting useful and relevant for decision and policy makers who need future predictions.

The **International Journal of Forecasting** places strong emphasis on empirical studies, evaluation activities, implementation research and ways of improving the practice of forecasting. It is open to many points of view and encourages debate that aims to find solutions for problems facing the field.

## SPECIAL ISSUE

Volume 3, no. 1 (March 1987) is a Special Issue on Exchange Rate Modelling and Forecasting, edited by Don Alexander, Richard T. Baillie and Lee Thomas.

Contents: Economic Theory and Exchange Rate Forecasts (Alan C. Stockman), Monetary/Asset Models of Exchange Rate Determination, How Well Have They Performed in the 1980's? (Don Alexander, Lee R. Thomas, III), Time-varying risk premia, imperfect information and the forward exchange rate (Rene M. Stulz), Optimal Currency Basket in a World of Generalized Floating: An Application to the Nordic Countries (Hali J. Edison, Erling Vardal), Comparing Exchange Rate Forecasting Models: Accuracy versus Profitability (Paul Boothe, Debra Glassman), The Behavior of Real Exchange Rates (James R. Lothian), Cointegration and Models of Exchange Rate Determination (Richard T. Baillie, David D. Selover), Multimaturity Efficient Market Hypotheses: Sorting out Rejections in International Interest and Exchange Rate Markets (Robert E. Lippens), Forecasting the Volatility of Currency Exchange Rates (Stephen J. Taylor), The Profitability of Currency Speculation (John F.O. Bilson, David A. Hsieh), Tests of the Martingale Hypothesis for Foreign Currency Futures with Time-Varying Volatility (Thomas H. McCurdy, Ieuan G. Morgan)

## SUBSCRIPTION INFORMATION:

In 1987 the International Journal of Forecasting will be published in one volume of four issues. The subscription price for 1987 (volume 3): US $117.00/Dfl. 290.00 (including postage and handling). ISSN 0169-2070.

*Members of the IIF will receive the International Journal of Forecasting as part of their membership*

*Coupon for a FREE inspection copy of the* **INTERNATIONAL JOURNAL OF FORECASTING**

## HANDBOOKS IN ECONOMICS · BOOK 4

General Editors: KENNETH J. ARROW and MICHAEL D. INTRILIGATOR

# HANDBOOK OF PUBLIC ECONOMICS

Editors: ALAN J. AUERBACH and MARTIN FELDSTEIN

The Handbook of Public Economics (in 2 volumes) presents an up-to-date survey of the field of Public Economics by those actually doing work on the frontiers of the subject. The material is presented so that it can be used by the public finance specialist, but also understood by the student and non-specialist.

**VOLUME I**

1. A Brief History of Fiscal Doctrine
   R.A. MUSGRAVE
2. The Theory of Excess Burden and Optimal Taxation
   ALAN J. AUERBACH
3. Public Sector Pricing
   DIETER BÖS
4. Taxes and Labor Supply
   JERRY A. HAUSMAN
5. The Effects of Taxation on Savings and Risk Taking
   AGNAR SANDMO
6. Tax Policy in Open Economies
   AVINASH DIXIT
7. Housing Subsidies: Effects on Housing Decisions, Efficiency, and Equity
   HARVEY S. ROSEN
8. The Taxation of Natural Resources
   TERRY HEAPS and JOHN F. HELLIWELL

*August 1985 xvii + 474 p.*
*ISBN 0-444-87667-7*
*US $65.00 in the U.S.A./Canada*
*Dfl. 215.00 in all other countries*

**VOLUME II** (Preliminary)

9. Theory of Public Goods
   WILLIAM H. OAKLAND
10. Incentives and the Allocation of Public Goods
    JEAN-JACQUES LAFFONT
11. The Economics of the Local Public Sector
    DANIEL RUBINFELD
12. Markets, Government, and the 'New' Political Economy
    ROBERT INMAN
13. Income Maintenance and Social Insurance
    ANTHONY B. ATKINSON
14. The Theory of Cost-Benefit Analysis
    JEAN DRÈZE and NICHOLAS STERN
15. The Theory of Pareto-Efficient and Optimal Redistributive Taxation
    JOSEPH STIGLITZ
16. Tax Incidence
    LAURENCE KOTLIKOFF and LAWRENCE SUMMERS
17. Business Taxation, Finance and Investment
    MERVYN KING

*Scheduled for publication: 1986*
*US $65.00 in the U.S.A./Canada*
*Dfl. 215.00 in all other countries*

***PRICE per set of two volumes:***
***US $110.00 (in the U.S.A./Canada)/Dfl. 400.00 (Rest of World)***
***Set ISBN 0-444-87646-4***

## INSTRUCTIONS TO AUTHORS

(1) Papers must be in English.

(2) Papers for publication (four copies) should be sent to:

Professor A.B. Atkinson
Editor, Journal of Public Economics
London School of Economics
10 Portugal Street
London WC2A 2HD, UK

Submission of a paper will be held to imply that it contains original unpublished work and is not being submitted for publication elsewhere. The Editor does not accept responsibility for damage or loss of papers submitted. Upon acceptance of an article, author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

(3) Manuscripts should be typewritten on one side of the paper only, double-spaced with wide margins. All pages should be numbered consecutively. Tables, references and legends for figures should be typed on separate pages. Titles and subtitles should be short.

(4) The first page of the manuscript should contain the following information: (i) the title; (ii) the name(s) and institutional affiliation(s) of the author(s); (iii) an abstract of not more than 100 words. A footnote on the same sheet should give the name and *present address* of the author to whom proofs and reprint order form should be addressed.

(5) Acknowledgements and information on grants received can be given before the References or in a first footnote, which should not be included in the consecutive numbering of footnotes.

(6) Important formulae (displayed) should be numbered consecutively throughout the manuscript as (1), (2), etc. on the right-hand side of the page. Where the derivation of formulae has been abbreviated, it is of great help to referees if the full derivation can be presented on a separate sheet (not to be published).

(7) Footnotes should be kept to a minimum and be numbered consecutively throughout the text with superscript arabic numerals.

(8) The References should include only the most relevant papers. In the text, references to publications should appear as follows: "Smith (1969) reported that..." or "This problem has been a subject in literature before [e.g., Smith (1969, p. 102)]". The author should make sure that there is a strict "one-to-one correspondence" between the names (years) in the text and those on the list. At the end of the manuscript (after any appendices), the complete references should be listed as:

*For monographs*
Ehrenberg, A.S.C., 1972, Repeat-buying. Theory and applications (North-Holland, Amsterdam) 33—35.
*For contributions to collective works*
Glesjer, H., 1970, Predictive world models, in: C. Duprez and E.S. Kirschen, eds., Megistos, A world income and trade model for 1975 (North-Holland, Amsterdam) 3—16.
*For periodicals*
Goldfeld, S.M. and R.E. Quandt, 1973, A Markov model for switching regressions, Journal of Econometrics 1, 3—15.

Note that journal titles should not be abbreviated.

(9) Illustrations should be provided in triplicate (1 original drawn in black ink on white paper+2 photocopies). Care should be taken that lettering and symbols are of a comparable size. The drawings should not be inserted in the text and should be marked on the back with figure numbers, title of paper, and name of author. All graphs and diagrams should be referred to as figures and should be numbered consecutively in the text in arabic numerals. Graph paper should be ruled in blue and any grid lines to be shown should be inked black. Illustrations of insufficient quality which have to be redrawn by the publisher will be charged to the author.

(10) All unessential tables should be eliminated from the manuscript. Tables should be numbered consecutively in the text in arabic numerals and typed on separate sheets.

Any manuscript which does not conform to the above instructions may be returned for the necessary revision before publication.

Page proofs will be sent to the authors. Corrections other than printer's errors may be charged to the author. 25 reprints of each paper are supplied free; additional reprints are available at cost if they are ordered when the proof is returned.

# Public Enterprise Economics

## Theory and Application

*By* **DIETER BÖS,** *Institut für Gesellschafts- und Wirtschaftswissenschaften der Universität Bonn, Bonn, West Germany*

ADVANCED TEXTBOOKS IN ECONOMICS, Volume 23

1986 472 pages Price: US $32.50/Dfl. 110.00 ISBN 0-444-87899-8

*Public Enterprise Economics: Theory and Application* is a clear, precisely written presentation of an important branch of the modern, micro-economically based theory of public finance, using only calculus.
Answers are provided to some pertinent economic questions, such as the influence of rationed labour and energy markets on public pricing, and the influence of political models on denationalization.
Great importance is attached to rate-of-return regulation, the peak-load problem, and the well known rules of public pricing (marginal-cost pricing, pricing under a revenue-cost restraint, and adjustments to monopolistic structures in the private economy), which are elucidated in the light of contemporary theory.
The most important theoretical pricing rules are empirically tested by using data on London Transport.

*CONTENTS:* Preface. *Chapter 1.* Introduction. **Part One: The Basic Model.** *Chapters: 2.* Essential Parts of Public Sector Pricing Models. *3.* Normative Optimum Theory. *4.* Positive Optimum Theory. *5.* Normative Piecemeal Theory. *6.* Positive Piecemeal Theory. **Part Two: Normative Theory: Public Pricing Policies for Welfare Maximization. A. - Basic Rules.** *Chapters: 7.* Marginal-Cost pricing. *8.* Ramsey Pricing. *9.* Rate of Return Regulation. *10.* Pricing with Distributional Aims. **B. - Interdependencies With The Private Economy.** *11.* Adjustment to Monopolistic Pricing in the Private Sector. *12.* Adjustment to Rationed Markets. **C. - Time-Dependent Pricing.** *13.* Pricing Through Time and Adjustment Clauses. *14.* Peak-Load Pricing. **D. - Public Pricing When Quality Matters.** *15.* Different Approaches Towards Optimal Quality. **Part Three: Positive Theory: Public Pricing Policies to Achieve Politicians' and Managers' Aims. A. - Politicians and Bureaucrats.** *Chapters: 16.* Winning Votes. *17.* Maximizing Budgets. **B. - Managers of Public Enterprises and Unions.** *18.* Maximizing Output or Revenue, Minimizing Energy Inputs. *19.* Minimizing Price Indices. *20.* The Influence of Unions. *21.* Quality in Positive Theory Models. *22.* A Set of Axioms for Prices to Achieve a Fair Allocation of Costs. **Part Four: Application of the Theoretical Results: The Example of London Transport.** *Chapters: 23.* Economic Theory and Empirical Analysis (I): Specifying Demand. *24.* Economic Theory and Empirical Analysis (II): Specifying Technology. *25.* Bus and Underground Services in London. *26.* Estimating Normative and Positive Prices for Bus and Underground in London. **Appendices. References. Index.**
